[Portfolio](#)

### Objective

---

Proficient Full Stack Web Developer with hands-on experience in React, Next.js, Node.js, and database management using MongoDB and Neon Postgres. Skilled in implementing Redis Upstash and Drizzle ORM for optimized data handling, and adept at utilizing Qstash for automated workflows. Seeking to leverage technical expertise to contribute to innovative web solutions in a dynamic IT environment.

### Projects

**Project:** DevOverflow

**Role:** Full-Stack Developer

**Technologies:** Next.js 14, React, Node.js, MongoDB, Clerk, TinyMCE, OpenAI API

**Description:** Developed a Q&A platform for developers, enhancing community engagement through AI-generated responses and a rich-text editor.

#### Key Contributions:

- Implemented secure user authentication with Clerk.
- Integrated TinyMCE for rich-text editing.
- Leveraged OpenAI API for AI-driven answers.

**Project:** Career Bridge

**Role:** Full-Stack Developer

**Technologies:** React, Node.js, mongoDB, Express.js

**Description:** Developed a job portal facilitating connections between employers and job seekers, enhancing the recruitment process through efficient job postings and application management.

#### Key Contributions:

- Designed and implemented a responsive user interface using React, ensuring seamless user experience across devices.
- Developed RESTful APIs with Node.js to manage job listings, applications, and user authentication.
- Utilized MongoDB for reliable data storage
- Deployed the application on Vercel, ensuring scalability and high availability.

## Education

---

Guru Gobind Singh Indraprastha University

2023-2026

Bachelors in Computer Application

## Skills & abilities

---

- React
